

Fire Protection

150 lb. Class D Cartridge Operated Fire Extinguisher Unit
Wheeled Fire Extinguisher Units are designed to protect high fire-risk areas where the potential for large fires exists. These heavy duty units have greater extinguishing agent capacities than portable extinguishers, yet are highly mobile and can be fully operated by just one person.

Typical applications of wheeled fire extinguishers include: airports, loading docks, steel mills, paint spray booths and heavy manufacturing areas.

- ULC Rating: Refer to Extinguisher Nameplate
- 14 ft. Range
- 65 Second Discharge Time
